

Assignment:2 Row,Column Alignment

Part1

```
import 'package:flutter/material.dart';

void main() {
  runApp(MaterialApp(
    home: Scaffold(
      body: SafeArea(
        child: Row(mainAxisAlignment: MainAxisAlignment.spaceBetween, children: [
          Container(
            height: double.infinity,
            width: 90,
            color: Colors.red,
            child: Text("I am red"),
          ),
          Container(
            height: double.infinity,
            width: 90,
            color: Colors.blue,
            child: Text("I am blue"),
          ),
          Container(
            height: double.infinity,
            width: 90,
            color: Colors.green,
            child: Text("I am green"),
          ),
        ]),
      ),
    ));
}
```

Part2

```
import 'package:flutter/material.dart';

void main() {
  runApp(
    MaterialApp(
      home: Scaffold(
        body: SafeArea(
          child: Column(
            children: [
              Container(width: double.infinity,
                SizedBox(
                  height: 20,
                ),
              Container(
                child: Row(
                  mainAxisAlignment: MainAxisAlignment.spaceEvenly,
                  children: [
                    Column(
                      crossAxisAlignment: CrossAxisAlignment.start,
